

Website Brainstorming Worksheet

Imagine every teacher you had in high school or elementary school had a website. (Not just a webpage, but a full-blown site with a variety of pages and links.) What would you as a student have wanted that teacher to post on that website? Homework assignments? Lecture notes? Further explanation of information?

Use the space below to record 15-20 'things' that should appear on a teacher's website that would benefit his or her **students**.

Now, think like a parent. (I know, that may be tough for some of us; for others, you live with this day and night, so it is not a problem.) What information would you want that teacher to provide you? Assignments? At-home enrichments? Contact information?

Use the space below to record 10-15 'things' that should appear on a teacher's website that would benefit his or her students' **parents**.
